

MULTIFUNCTIONAL FUSE MF, M14

The fuse is intended for completion of the HE artillery projectiles, of the classical artillery from 105 mm to 155 mm caliber with Sp 2"-12 UNS – 1A thread.

TECHNICAL CHARACTERISTICS:

Possessing:	proximity, timing and PD functions
Activation altitude:	8 ± 7 m
Electronic overhead safety:	5 s
Muzzle safety distance:	min. 400 calibers
Power supply:	electrochemical reserve cell
Required for arming	
• setback:	20.000 m/s ² to 250.000 m/s ²
• rotation:	2.000 o/min to 25.000 o/min
Temperature range	
• operational:	-30°C to +50 °C
• storage:	-40°C to +60 °C
Standard:	MIL-TD-316D MIL-STD-331
Weight:	0,820 kg
Life cycle:	15 years
Status:	in AME of SAF
