

“KOBAC-2-PR-PASARS” KIT FOR DETECTION AND JAMMING OF UAVs

“KOBAC-2-PR- PASARS” kit for detection and jamming of UAVs enables:

- Automatic detection and destruction of short-range UAVs;
- Creating the protective zone within 2 km radius;
- Capability of jamming in a designated sector and in all directions;
- Capability of connecting with RPS-42 radar;
- Capability of operation in automatic and manual regime.

KOBAC-2-PR- PASARS consists of the following components:

- Radio-reconnaissance set;
- Radio-jamming set;
- Antenna array;
- Remote control set with threat indicator.

TECHNICAL CHARACTERITICS:

Frequency band - searching:	400 MHz up to 6000 MHz;
Frequency band - jamming (5 modules):	800-1000 MHz / 1164-
1610 MHz / 2200-2500 MHz / 3400-3800 MHz / 4900-5900 MHz;	
Transmitting power:	20 W (per module);
Jamming techniques:	<i>sweep, multisweep.</i>
