

“КОВАС-2-PR-TANK” KIT FOR DETECTION AND JAMMING OF UAVs

“КОВАС-2-PR-TANK” kit for detection and jamming of UAVs enables:

- Automatic detection and neutralization of short-range UAVs;
- Creating the protective zone within 2 km radius;
- Capability of operation in automatic and manual regime;
- Capability of jamming in all directions.

KOBAC-2-PR-TANK consists of the following components:

- Radio-reconnaissance set;
- Radio-jamming set;
- Antenna array;
- Application control software with threat indicator.

TECHNICAL CHARACTERISTICS:

Frequency band - searching:	400 MHz UP TO 6000 MHz;
Frequency band - jamming (5 MODULES):	400-500 MHz / 800-000
MHz / 1164-1610 MHz / 2200-2500 MHz / 4900-5900 MHz;	
Transmitting power:	> 20 W (PER MODULE);
Jamming techniques:	<i>sweep, multisweep.</i>
